

Enhanced Drug Card

guard.me International Insurance celebrates its 20th anniversary with a focus on improving the student experience. **guard.me**'s decision to partner with MDM Insurance Services has significantly streamlined the prescription medication and dental reimbursement process for international students.

With the introduction of our Enhanced MDM ID Card, students may now use this card at both pharmacies and dental offices for eligible services.

guard.me's Enhanced MDM Drug Card allows students to be immediately informed of their remaining balance and eligibility for reimbursements directly at the drug store counter or dental office.

Easy

The pharmacy and dental office handle the logistics on behalf of the student and school

Innovative

Peace of mind when claims are approved immediately

Fast

Quick access to emergency dental care and eligible prescription medication

How It Works

The **guard.me** MDM ID Card functions as a prescription drug and emergency dental card for eligible expenses.

For Prescription Care

-  The student provides their **guard.me** MDM ID Card with their signed prescription at a pharmacy of their choice
-  The pharmacy will check if the prescription medication is covered
-  Medications are immediately processed at the counter by the pharmacy. Eligible prescriptions means no payment required. The student doesn't have to pay - it's that easy!

For Emergency Dental Care

-  The student provides their **guard.me** MDM ID Card to their dental office
-  The dental office will check if the emergency dental procedure is covered by the student's insurance plan
-  Eligible dental procedures will be processed by the dental office. The student doesn't have to pay - it's that easy!
